

What makes us different?

Ben Holden Ltd offer specialist case management and rehabilitation for severely and catastrophically injured people. Established in 2009, we are a company rooted in East Anglia and are active across the UK and Europe.

Clinical expertise where it matters most.

Ben Holden Ltd specialise in the most complex rehabilitation and case management for both adults and children, including people with acquired brain injuries, spinal injuries, amputations and polytrauma.

Strong infrastructure, ready to respond.

As a proudly CQC registered organisation, quality of service is the backbone of our operations, underpinned by our strong infrastructure.

With a dedicated support worker recruitment team, experienced admin support and a Registered Manager on hand, we're structured for responsiveness, quality and compliance.

More than just case management.

We're not a one-trick pony. Alongside our specialist case management, we offer the direct recruitment of support workers for our clients, a Mental Capacity Assessment service, a Moving & Handling service, a dedicated Triage service to support clients with less severe injuries to access early intervention, and an affiliated Expert Witness service, among many others.

We're also developing an accessible holiday home in Suffolk for people with complex needs, as part of our long-term vision to support individuals beyond their clinical care.

Our services are broad, integrated and designed to meet the full breadth of our clients' needs.

Rooted in East Anglia, active across the UK and beyond.

We're the go-to provider for East Anglia, but we work across a number of regions, delivering the same high standards of care wherever we go.

Sustainability is built into our DNA.

We are committed to playing our part in protecting the environment. We've been paperless since 2013, we run a fleet of electric vehicles, we power one of our offices with 100% renewable, vegan energy and use only durable, recyclable tech. Not only that, we've even planted a woodland in Suffolk to offset our emissions.

Independent and proud.

We are one of the largest independent case management companies in the UK – owned and directed by the clinician who founded us. There's no corporate machine, just a passionate team focused on high-quality, bespoke, person-centred rehabilitation.

People with experience.

We have a high ratio of very experienced case managers in our team who, alongside the next generation rising through the ranks, bring proven expertise, know-how and years of experience.

A great place to work and learn.

Ben Holden Ltd boasts flexible roles, generous training opportunities, extensive internal CPD within a genuinely supportive, friendly and warm company culture. We are a business that invests in its people.

Inclusion isn't a side note – it's a priority.

Diversity, equity and inclusion are embedded in every part of our culture, team and service delivery.
